

Somalia Rainfall Forecast

Food and Agriculture Organization of the United Nations

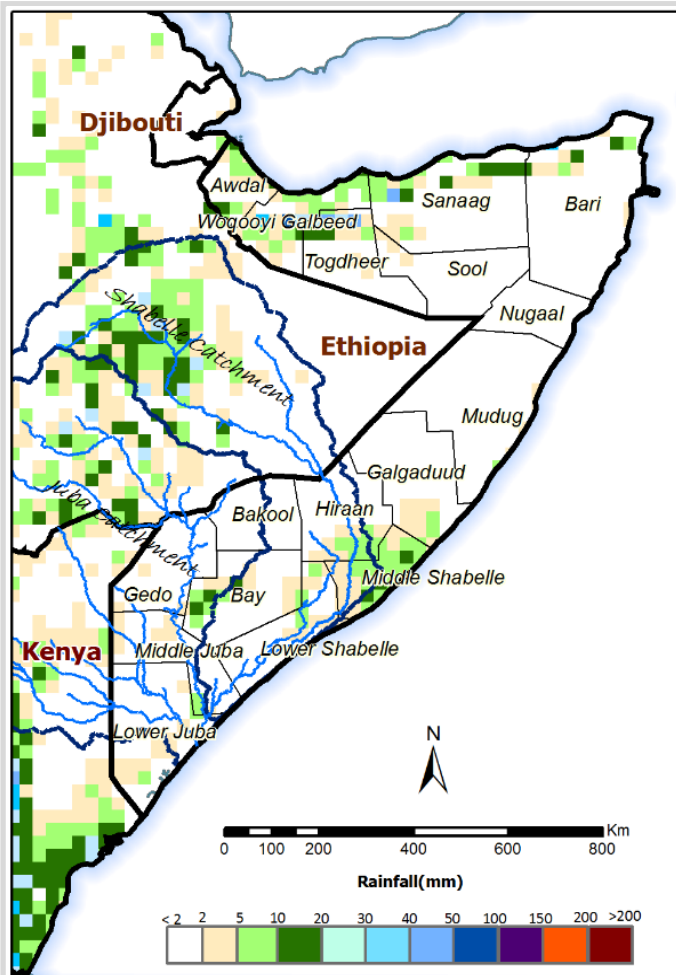

Issued: 23 November 2018

The rainfall forecast for the next seven days is calling for a reduction of rainfall activities in the country. The Juba and Shabelle river basins in the Ethiopian highland are also expected to see reduced amounts of rains in the coming week. Somaliland, Puntland and central regions will remain dry during the week in review except the coastal areas that may receive light rains.

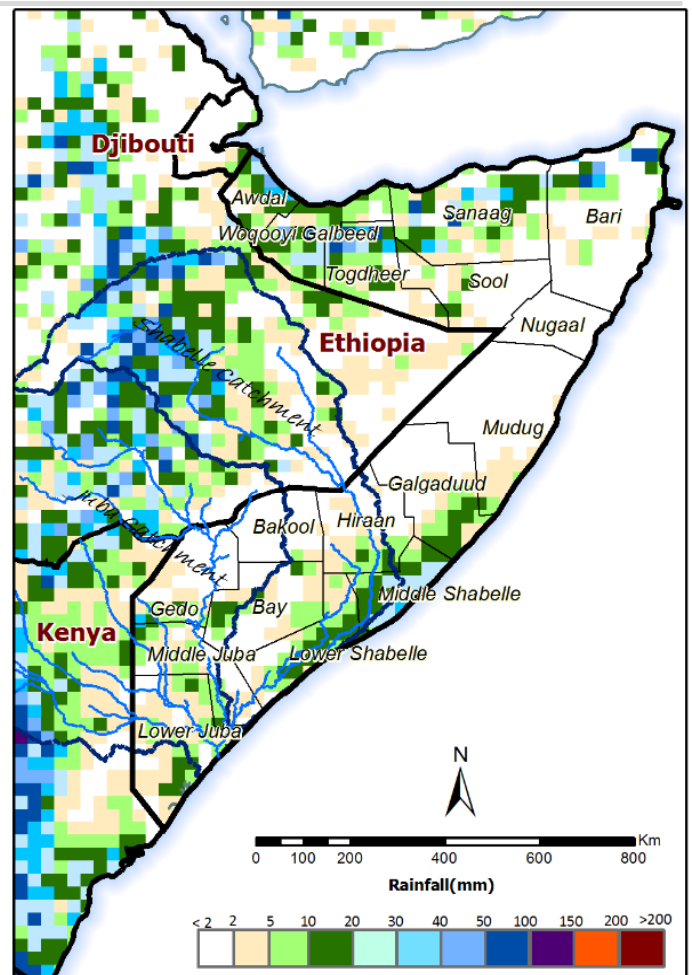

Given the rainfall forecast, river level along the Juba and Shabelle are expected to see a drop.

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found on this link: <http://frrims.faoswalim.org>

Map 1: 3-day cumulated rainfall forecast (23 to 25 November 2018)

Map 2: 7-day cumulated rainfall forecast (23 to 29 November 2018)
